

Kickoff Event
Fact Sheet=

The city of Atlanta is undertaking study in the Bolton/Moores Mill area to study circulation patterns and to identify and define steps to provide the most appropriate transportation network by addressing the following:

Industrial traffic circulation and previous plan efforts

Dedicated lanes for specific classes of traffic, especially truck traffic

Interconnectivity of the transportation system=

This study is being funded by the Livable Centers Initiative program, sponsored by the Atlanta Regional Commission (ARC), Atlanta's regional government. This grant program is intended to promote greater livability, mobility, and residential and development alternatives in existing employment and town centers throughout the Atlanta region.

General consensus of the affected parties on how this will be accomplished is critical to the success of the planning effort. It is important for stakeholders, government officials, and the general public to articulate, in as much detail as possible, what they find important to include in the study and to understand what is feasible.

In addition to today's Kickoff Event and an Advisory Committee, two other meetings are planned at key decision making points in the process. These public meetings are scheduled:

Findings/Prioritization - Workshop

November 17, 2004
6:30 - 8:30 PM,
Agape Community Center
2351 Bolton Road

Final Document Approval - Open House

December 16, 2004
6:30 - 8:30 PM
Clayton Plant Auditorium
2440 Bolton Road

Bolton / Moores Mill

Transportation and Circulation Study

Kickoff Event
Fact Sheet

The city of Atlanta has undertaken or been involved in several other efforts that will be used as a base on which to build recommendations for this plan. These studies include the following:
